### PHILODENDRON

selloum

Garden Height: 1.8-3m  
Garden Width: 1.8-4.5m

**P**hilodendron is a hardy arborescent philodendron. It's massive silhouette wide leaves give a lush tropical effect. It grows well and moderately rapidly. Could be used as a mainstay in a combo and continue long after the colourful fillers have gone.

Leaf Zone: dark green  
Heat Tolerance: 35-40°C  
Vigour: very vigorous  
Habit: upright and clumping  
Light Exposure: partial shade

Generic Label Available 5088

**P**hilodendron Tuxla is ideal for 100mm pot production as a Rosette type. It also vines as it matures and makes a great pole or table top 15cm plant. It is most known for being disease resistant. It also does very well in low light, ie: can be grown under hanging baskets. Tuxla finishes quickly as a 100-150mm pot.

A large clumping plant with very large lobed leaves.

Leaf Zone: dark green  
Heat Tolerance: 30-40°C

Vigour: average  
Habit: initially clumping, then climbing  
Light Exposure: semi shade

Garden Height: climbing

Generic Label Available 5181
