

Bred as a series for both the grower and the consumer, Americana® Geraniums are the industry standard. They offer an outstanding basal-branching habit that is extremely free flowering with large flower heads. The series is available in a distinct colour range, adding diversity to the Geranium colour selection. Americana® Geranium's heat tolerance makes for exceptional garden performance.

Garden Height: 30-45cm

Garden Width: 30-45cm

Light Exposure: full sun

Scheduling

Zonals - If grown under optimum conditions, in southern climate zones, the time from potting of the rooted cuttings (one cutting per pot) to finishing:

10cm pot = 7-8 weeks;

13cm pot = 9-10 weeks;

15cm pot = 11-12 weeks;

18cm pot = 14-15 weeks;

25cm pot = (3 plants/pot) 11-12 weeks;

Under warmer northern conditions, time can be reduced by 1-2 wks.

cherry rose

dark red

orchid

white

See www.naturalselections.com.au for complete cultural notes.

- Bold and clear flower colours offer outstanding garden performance.
