

Calliope is a revolutionary break through in geranium breeding. It offers true dark red colour in a zonal plant. Calliope Dark Red is an interspecific hybrid with zonal type flowers and leaves. Calliope is a vigorous grower with a mounding to semi trailing habit. It is best used in baskets and larger containers. It is not recommended for smaller pots. Outside it is excellent in ground beds, baskets and patio containers. Calliope has excellent heat tolerance in the landscape and provides large blooms in both full sun and partial shade areas.

Garden Height: 25-30.5cm
 Garden Width to: 45-51cm
 Light Exposure: full sun-partial shade
